

Sage 500 ERP

Release Notes
Version 2026

Installation/Upgrade

.NET Framework 4.8

.NET Framework 4.8 will be installed automatically with the Sage 500 ERP Client or DB Express Install installations. The .NET Framework 3.5 must be turned on in 'Turn Windows features on or off' before installing Sage 500 ERP Client in Windows environments.

All Modules

Roaming Profiles

- Sage 500 DOES NOT support Roaming Profiles.

Embedded Browser

- Updated the basic internal browser to use the WebView2 (Edge Chromium) browser control for standard web page display in the product. This will allow modern web Page use and not launch an external Edge Browser.
- For Visual Process Flow the original IE based browser control will be used. Should be seamless to the user.

Sage Ally

- Add in the ability to use Sage Ally AI Chat bot for assisting in answering questions on product use.

Network Installation

Network installation over a share point is not supported.

Accounts Payable

Sage 500 ERP has been enhanced to allow 1099 recipients to receive their 1099 electronically via e-mail using the 1099 software from Aatrix. A new Aatrix AESCrypto.dll has been updated. Additionally, the 1099 payor can now optionally specify a specific street / e-mail address for the 1099, and now allows a 1099 specific First/Middle/Last name to be printed on the 1099.

The taxpayer ID for a vendor, commonly a social security number, is now masked or requires a security event to be shown in plain text.

Credit Card

SED 2.0

Sage 500 ERP no longer supports Sage Exchange Desktop 1.0. Go to <https://www.sageexchange.com/install/sed2/> to download the latest version of Sage Exchange Desktop 2.0 (now known as Paya). After installing Sage Exchange Desktop 2.0, any existing version of Sage Exchange Desktop 1.0 components will be uninstalled.

TLS Support

Older SSL/TLS 1.0/1.1 requirements have been removed. Customers can now disable support for older SSL, TLS 1.0 and 1.1 cryptographic protocols.

SDK

The Cross-Reference utility is no longer provided with the Sage 500 SDK, since this functionality is fully supplied by SQL Management Studio.

Appendix 1: Fixed Issues in v2026 by Module

Module	Issue ID	KB Article ID/PER Number	Short Description
AP	50854	250313161740260	Conversion error on EFT – Register/Post process
AP	50808		Update 1099 application to handle new Aatrix AESCrypto.dll
AP	50782		AP 1099 Beginning Balances - Enhance to include vendor filtering capability.
AP	50780		AP 1099 Beginning Balances - Enhance to add filtering help.
AP	50778		AP 1099 Beginning Balances - Enhance to include filtering capabilities.
AP	50768	240422182853340	Process Credit Card Transfer uses the full voucher amount instead of the remaining balance of the Voucher already partially paid
AP	50758		Inform 1099 user when a previous submission batch removal is complete
AP	50756	240105193803067	1099 Pre-Saved Settings does not work properly
CC	50875		Paya Test Connection Issue and Saving Customer EFT Settings failing to save due to error
FrmWrk	50878		Update Crystal Reports distribution to SP34
FrmWrk	50877		Windows Server 2025 Support
FrmWrk	50865		Grid Manager fails to allow all surrogate key values in a Farpoint grid defined as integer. - Adapt Applications
FrmWrk	50830		Replace IE Browser based control with Edge (Chromium) based control
GL	50872		GL Set Up Account Structure fails when shortening a segment for a new company
IM	50853	231023202607990	Closed or Completed Work Orders are shown in Open Work Order Preview in the Maintain Items task.
IM	50820	250103213135580	IM Global Price Group Change Export to Excel is not working on Office 365
MF	50868		44337: Include tracking for changes to routings and routing versions - Update Help
MF	44337	107806	Include tracking for changes to routings and routing versions
MultiModule	50673		Enable users to use longer customer PO numbers
PA	50850		PA does not report posting to closed fiscal period error.
